

# Executive Security Scan Report — Scan #1

|                  |                       |                         |                     |
|------------------|-----------------------|-------------------------|---------------------|
| Target Endpoint: | http://localhost:3000 | Scan Status:            | COMPLETED           |
| Execution Date:  | 2026-09-03 10:39:51   | Composite Vector Score: | 35.0 / 100 (MEDIUM) |

## Vulnerability Severity Breakdown

| Severity Level | Discovered Count | CISA KEV Exploited | Max EPSS Score |
|----------------|------------------|--------------------|----------------|
| CRITICAL       | 1                | YES                | 0.975          |
| HIGH           | 0                | No                 | 0.0            |
| MEDIUM         | 0                | No                 | 0.0            |
| LOW / INFO     | 0                | No                 | 0.001          |

## Detailed Findings & Threat Intelligence

| ID | Check Name / Title                           | Severity | CISA KEV / EPSS              | Remediation Summary             |
|----|----------------------------------------------|----------|------------------------------|---------------------------------|
| #1 | SQL Injection Vulnerability (CVE-2021-44228) | CRITICAL | ■ IN CISA KEV<br>EPSS: 0.975 | Review target configuration.... |

CONFIDENTIALITY NOTICE: This report is generated locally by NKAT Sentinel Console. All scan findings, threat scores, and target metadata remain 100% strictly on localhost. Target endpoint authorization strictly validated against docs/AUTHORIZED\_TARGETS.md policy.
